

REMI 2.2 PREVIEW

Sherri Lawrence, Senior Vice President
Jerry Hayes, Manager, Software Development

Data Modifications

- Historical Period 2001-2016
- BLS Projections 2016-26
- Improved methodology for estimating suppressed state and county data
- Improved methodology for reconciling small county employment, employed, labor force, residence adjusted income, and residence adjusted employment (commuter) data

Policy Variables

- New ability to remove 100% of industry with Industry Employment or Industry Sales
- New National Value Added Tax (VAT)
- New National Border Adjustment Tax (BAT)

Policy Variables, continued

- New “Lagged” vs “Immediate” Options for Actual Capital Stock
- New “Lagged” vs “Immediate” Options for Production Cost
- New Detailed Intellectual Property Products (Translators)

Policy Variables, continued

- New Option on Personal Taxes to Indicate Marginal Propensity to Consume
- New Average Propensity to Save
- New Option on Consumption Reallocation to Assume Income Elasticity = 1

Forecast File Management

- Each forecast saved as individual files instead of bundled into workbooks
- All forecasts accessible from within the model
- Forecasts may be given descriptions and tags for organization and easier searching
- New import and export functions to replace copy and pasting workbooks

Forecast Window Management

- Each forecast has its own window and each will be shown on the taskbar
 - Easier to switch between forecasts
 - Forecasts can be on different monitors
 - No more searching for minimized forecasts or resizing forecasts to fit on the same window
- Each forecast window has its own navigation

Detail Aggregations

- Create custom aggregations for use with policy variables and results
 - Regions
 - Industries
 - Commodities
 - Occupations
 - Ages

Results Enhancements

- New navigation to find results
- Additional ways to view results
- Custom aggregations

Results Navigation

- New interface to better highlight available tables
- Fewer tables with more customization options
- Better integration of special results
- Customized results for control forecasts and simulations

Results Enhancements

- Custom detail aggregations
- More chart types
- More pivot options
- Compare regions to nation
- Compare results from multiple forecasts
