

The Leading Dynamic Local, State, and National Policy Model

PI+ is the premier software solution for conducting dynamic macroeconomic impact analysis of public policy. As our flagship model, PI+ specializes in generating realistic year-by-year estimates of the total local, state, and national effects of any specific policy initiative.

Regional Economic Models, Inc. (REMI) was founded in 1980 on a transformative idea: government decision-makers should test the economic effects of their policies before they're implemented. Our experience and development efforts have resulted in a comprehensive model that answers "what if...?" questions about your economy.

what does REMI say?

Meet the organizations that trust REMI's peer-reviewed software for their policy modeling needs:

- Sandia National Laboratories
Ernst & Young
Texas Comptroller
University of Michigan
Tennessee Valley Authority
National Educational Association
South Coast Air Quality Management District
North Carolina Department of Commerce
Wyoming Department of Administration & Information

PI+ provides an understanding of the intricate relationships between policies and their economic foundations through unparalleled, comprehensive economic impact analyses.

Proven Accuracy

Our clients' pioneering contributions to informing and guiding policy decisions are validated by REMI's peer-reviewed model equations.

Customized Models

Every model is custom-made and fully equipped with the complete inter-industry relationships found within your local, state, and regional economies.

Intuitive Software

PI+ is a desktop application with extensive user service and support functions, offering unlimited assistance and training from REMI.
