REMI SEI

The Leading Dynamic Local, State, and National Policy Model

REMI SEI is the premium modeling solution for evaluating the socioeconomic indicators (SEI) of project, programs, and policy changes. Decision-makers employ REMI SEI to understand the relationship between public policies in their industry and the varying economic effects across demographic groups at the local, state, regional, and national levels.

Regional Economic Models, Inc. (REMI) was founded in 1980 on a transformative idea: government decision-makers should test the economic effects of their policies before they're implemented. Our experience and development efforts have resulted in a comprehensive model that answers *"what if…?"* questions about your economy.

what does REMI say?

The industries of economic development that rely on dynamic socioeconomic analysis to influence their policies and practices include:

- Education
- Housing and Community Development
- Taxation
- Energy and Environment
- Immigration
- Healthcare and Social Services
- Transportation
- Labor and Workforce Development
- Consulting firms

REMI SEI is a premium software tool for economic impact analysis that can assess the core socioeconomic implications of programs and practices to pave a way towards more informed policymaking.
