Q&A

*what does **REMI** say?<sup>sm</sup>*

REMI's 40 year history of rigorous academic research and software development has led to the development of the state of the art model in macroeconomic research methodology:

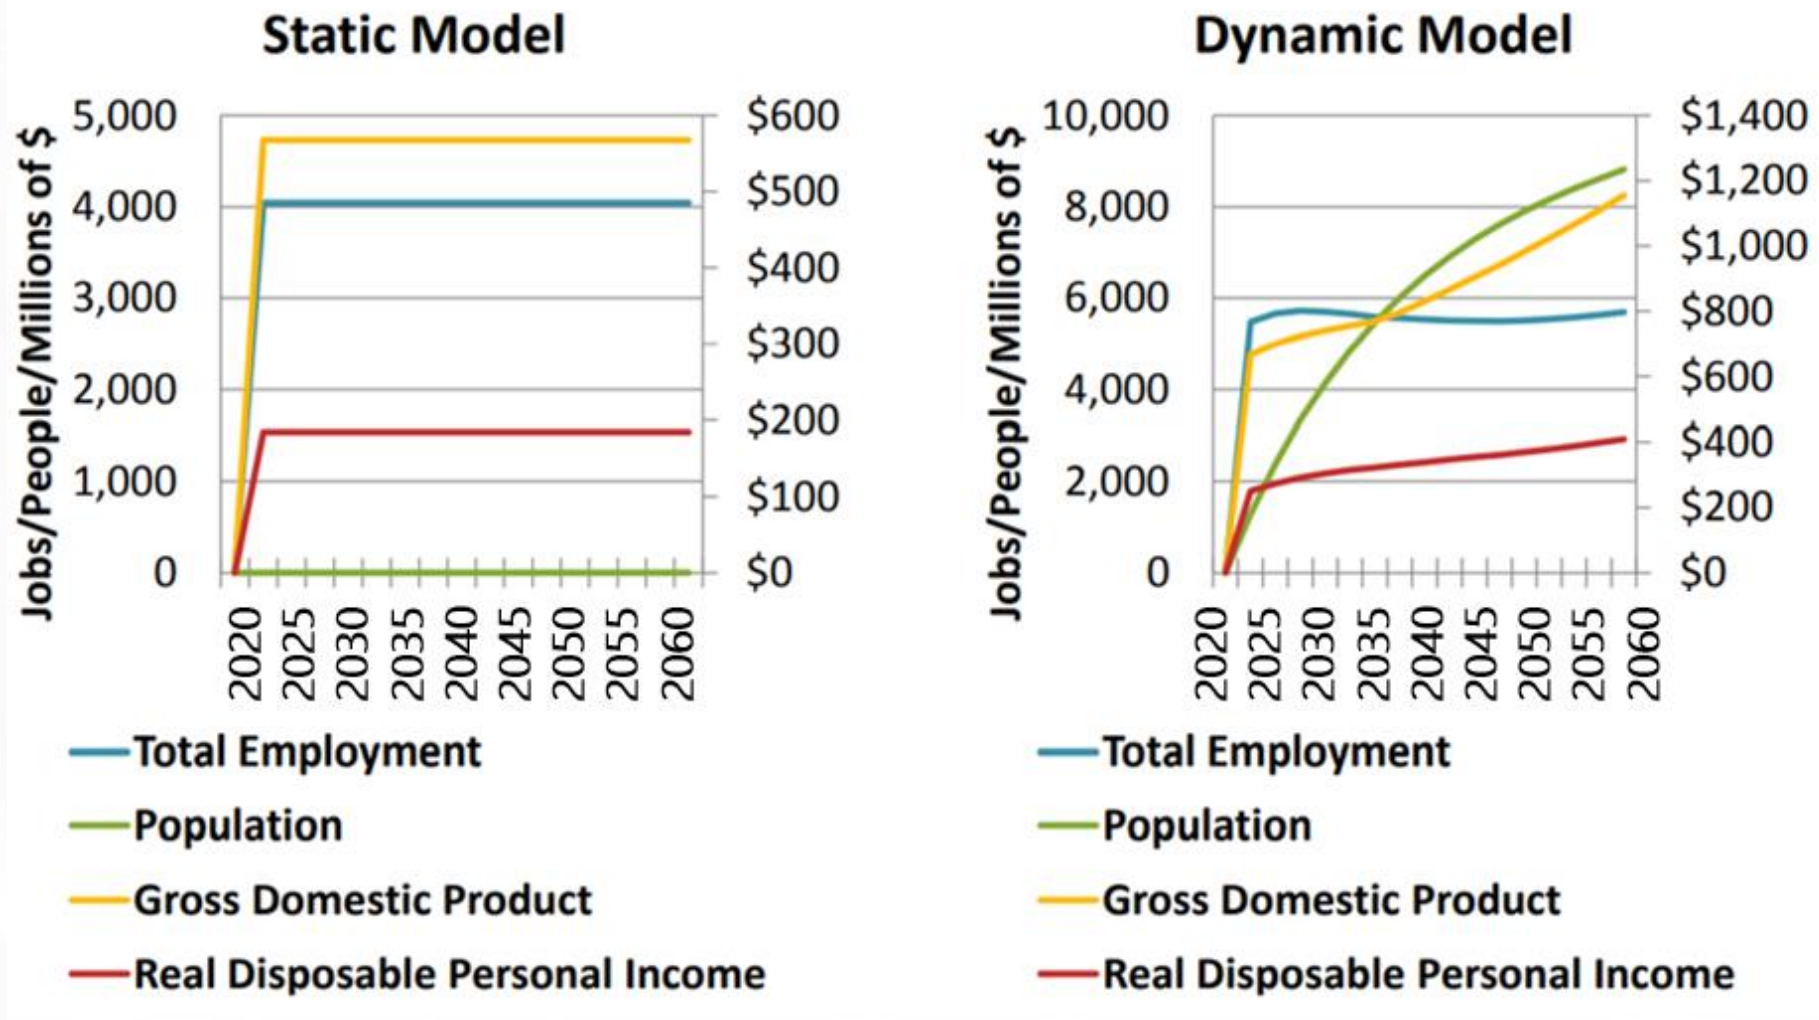

# How REMI defines model regions

- A county (or equivalent statistical unit) or...
- A collection of counties
  - e.g. an MSA or a state
    - Can cross state borders
- Multiple regions
- Customized by needs

Q&A

*what does **REMI** say?<sup>sm</sup>*

# What is TaxPI?

REMI Tax-PI is the only commercially available dynamic macroeconomic and fiscal impact analysis tool.

Tax-PI allows users to understand the deep linkages and relationship between a budget and its economic foundation

Q&A

*what does **REMI** say?<sup>sm</sup>*

## Guiding Concepts

- Many different stakeholders in the economy
- Wealth and income levels linked to race, gender, geography (rural vs urban), education
- American demography is changing; building a diverse workforce is imperative for future economic development and growth
  - Do policies benefit all income levels?
  - Do they increase or reduce income inequality?
  - Do all racial and ethnic groups benefit from policies?
  - Are we benefiting or disadvantaging those without higher education?

# Measurements of REMI-SEI

Compensation  
Distribution

Employment Changes  
by Earnings Quintile

Consumption Price  
by Earnings Quintile  
and Range

Inequality  
Coefficient

Employment by  
Race & Gender

Employment by  
Educational  
Attainment

Labor Force  
Participation  
by Race & Gender

Unemployment

Per Capita  
Income
