

# REMI TaxPI Model Training: How Rising Housing Prices Impact State Economies

Regional Economic Models, Inc.

# Agenda

Introduction

Overview of REMI

Economic Impacts of Rising Housing Prices

Overview of TaxPI and SEI

TaxPI Model Demonstration

Q&A

REMI's 39-year history of rigorous academic research and software development has led to the development of the state-of-the-art model in macroeconomic research methodology:

## Input-Output

Close analysis of inter-industry relationships

## General Equilibrium

Estimate of long-run stability of the economy allows for analysis of policy decisions

## Econometrics

Advanced statistical analyses underpinning the model

## Economic Geography

Effects of geographic concentration of labor and industry

Integrated REMI  
economic modelling  
approach

# How REMI defines model regions

- A county (or equivalent statistical unit) or...
- A collection of counties
  - e.g. an MSA or a state
    - Can cross state borders
- Multiple regions
- Customized by needs

TaxPI Model Demonstration

Q&A

# Economic impacts of Housing Price Increases

## Key Considerations

### Employment

Job creation increases housing prices. Housing construction provides widespread employment for various income groups.

### Direct Investment

Low interest rates encourage residential investments by investors and traditional homeowners to enter the housing market.

Housing inputs increased substantially, example: lumber up to 114% and iron/ steel up to 73%.

### Economic Growth

The housing market plays a significant role in the U.S. economy. Rising housing prices promote a robust economy, which is seen in GDP, output, and employment.

# Case Study: Oregon

## Housing Underproduction

- Lack of sustained supply response by 111,000 units in the past 20 years
- Supply and demand imbalances due to financing for land acquisition, development, and construction

## Affordability

- The pandemic boosted homeownership demand and disrupted supply chains.
- Rapid appreciation in annual rent and home prices
- Homeownership unattainable for lower to middle class residents

## Oregon's Economy

- Longest economic expansions in modern history
- Oregon's amenities are attractive to new residents and high-paying jobs
- One of the fastest growing states in the U.S.

Q&A

# What is TaxPI?

REMI Tax-PI is the only commercially available dynamic macroeconomic and fiscal impact analysis tool.

Tax-PI allows users to understand the deep linkages and relationship between a budget and its economic foundation

# Measurements of REMI-SEI

Compensation  
Distribution
